Long Term Water Repellent Treatment for External Masonry

Belzona® 5122 (Clear Cladding Concentrate) is a clear repellent treatment designed to prevent water penetration into building fabric, whilst retaining the natural appearance of the structure.

Belzona® 5122 (Clear Cladding Concentrate) will:

- Provide long term protection
- Prevent water penetration
- Reduce dirt retention
- Maintain building fabric insulation properties

This masonry treatment is an aqueous penetrating liquid material which when applied to porous surfaces forms an invisible micro-porous, water repellent barrier with the structure.

Belzona® 5122 (Clear Cladding Concentrate) can be applied without the need for specialist tools and is suitable for use on a wide range of porous mineral substrates including concrete, limestone, brick and sandstone.

Belzona® 5122

Clear Cladding Concentrate

Natural Stone

Reconstructed Stone

Concrete Structures

Statues and Monuments

Applications for Belzona® 5122 (Clear Cladding Concentrate) include:

- Stone structures
- Brickwork
- Concrete structures
- Statues and monuments
- Reconstructed stone

Belzona® provides the solution to your repair and maintenance needs.

BELZONA[®]
Repair • Protect • Improve

Belzona® 5122 (Clear Cladding Concentrate) is:

Simple

- Brush or spray applied
- Easily diluted on-site with water
- Single flood coat application

Safe

- Environmentally friendly
- Solvent free

Effective

- Effective on a wide range of porous substrates
- Micro-porous, allows substrate to breathe
- Reduces growth of mildew, moss and lichen
- Thermal conductivity of masonry is reduced improving insulation
- Does not alter the appearance of the substrate
- Prevents cracking and spalling due to freeze/thaw cycle
- Sheds dirt and atmospheric pollutants making for self cleaning surface
