Belzona 1818 is a fast curing, surface tolerant, abrasion resistant system ideal for patch repairs on surfaces subject to high erosion and abrasive environments.

Its fast curing properties result in minimal downtime for damaged equipment, and the product can experience full mechanical loading in as little as two hours after application.

This material has built in surface tolerant technology, enabling it to bond tenaciously onto steel substrates even when surface preparation is minimal or if the substrate is heavily contaminated with oil or water. The product can even be applied and cured underwater.

Supplied as a two-part system, Belzona 1818 is easy to mix and apply without the need for specialist tools and can be applied direct to the substrate with no need for an additional primer.

1000 Series
BELZONA 1818

Key Benefits:

- **Excellent abrasion resistance**
  Belzona 1818 exhibits outstanding abrasion resistance and can withstand erosion up to temperatures of 80°C (176°F).

- **Surface tolerant**
  Belzona 1818 can be applied directly onto manually prepared, wet or oil contaminated surfaces and can even be applied underwater.

- **Fast curing**
  Belzona 1818 is fast curing ensuring a quick return to service. Depending on ambient conditions, the product can experience full mechanical loading after only 2 hours.

- **Easy to mix and apply**
  No specialist tools required for mixing or application.

Application:

As shown in the image above, Belzona 1818 is ideally suited for patch repairs where a rapid return to service is required.

Application Areas:

- Turbo Separators
- Slurry pumps
- Grinding mills
- Screw conveyors
- Chutes and hoppers
- Hydrocyclones
- Wear plates
- Grit pumps
- Agitator shafts, hubs and blades
- Dust extraction pipe work

For more information, please contact your local Belzona representative.

QUALITY PRODUCTS - TECHNICAL SUPPORT
Belzona products are manufactured under an ISO 9001 Registered Quality Management System.

Belzona has a global distribution network of over 140 Distributors operating in 120 countries. Local support is provided by a trained Technical Consultant who will diagnose the problem, recommend the solution and provide 24-hour, on-site application supervision and advice.
